

Wall-Ecoin

WHITEPAPER

[0xb1e5fcbe8c0275275ad1125226294f5b773a980b](https://www.wall-ecoin.com)

INTRODUCTION

Wall-Ecoin was born in the Wall-E robot fan community and the online community of environmental protection organizations. It aims to motivate members of the environmental protection community through decentralized finance and better community autonomy and contribute to the environmental protection of the earth. Wall-Ecoin is a new deflationary decentralized coin that will become more scarce over time. Community holders are rewarded through smart contracts. Each transaction will automatically add more Wall-Ecoin to you in your wallet.

Wall-Ecoin is decentralized and is supported by the wall-e community of fans. All holders of Wall-Ecoin can earn more Wall-Ecoin by simply putting the Wall-Ecoin coins in their wallets, and these coins will be automatically sent to your wallet. because all holders will charge a 5% fee for every transaction that occurs on the Wall-Ecoin network.

DISCLAIMER

This Whitepaper taken by itself is not a contract or a contractual agreement of any kind, nor is it an invitation, solicitation, or over to invest in Wall-Ecoin or acquire or use Wall-Ecoin tokens in any way and with any expectation of profit therefrom. Wall-Ecoin is not in any way e-money and/or fiat money, or an asset-backed stable coin, whether global or limited in scope. Any user of Wall-Ecoin represents and warrants that such user has received appropriate technical, administrative, regulatory, and legal advice before and are accessing and/or reading this Whitepaper or the Website, and/or using any portion or element of Wall-Ecoin {including the Wall-Ecoin token). Any terminology used in this Whitepaper, on the Website, or within the app is intended only as a basic reference, without any elective or legal meaning of the same terms in a regulated and or financial environment.

The Wall-Ecoin token is strictly a utility token in all jurisdictions and is not and cannot be considered to be a "security" or otherwise regulated token of any kind. Wall-Ecoin is a decentralized and community-driven project and does not have owners, shareholders, promoters, marketers, managers, directors, or other figures or entities exerting any form of governance. The Wall-Ecoin smart contracts are open-source, security audited, permanent, and non-modifiable in any way. Wall-Ecoin, including but not limited to the overall project, token, website, smart contracts and any apps {"Wall-Ecoin") as presented in this conceptual paper is not a licensed, unlicensed, or exempted financial or payment service of any kind and in any jurisdiction. The user hereby acknowledges and accepts that there is an inherently high risk in accessing, acquiring, or using any kind of blockchain and/or cryptosystem, token, platform, software, or interface, including Wall-Ecoin, and further disavows any claim of any kind against any community member directly or indirectly involved with Wall-Ecoin, for any damage suffered, including total loss. Wall-Ecoin makes a credit card interface available on its website solely for the users' convenience. The Company is not a payment processor of any kind and has no control over credit card processing. Use at your own risk.

01 SUMMARY

Wall-Ecoin COMMUNITY

Wall-Ecoin was born in a great Internet community. Every member of the community is extremely proud of the birth of Wall-Ecoin. A truly decentralized community, based on BSC's smart contract, is a real deflation mechanism that benefits the community's Wall-Ecoin holders.

Wall-Ecoin SWAP

Wall-Ecoin swap is a decentralized trading protocol based on BSC. All transactions on the exchange are automatically executed by smart contracts. Users do not need to rely on an intermediary or trust a third party.

Wall-Ecoin WALLET

The assets follow the mnemonic phrase without any human involvement such as the review of the withdrawal, completely decentralized. User assets are completely autonomous and controllable. On our roadmap, Wall-Ecoin Wallet will allow users to track the rewards they receive from reflections, wallet balances, coin valuations, etc.

Wall-Ecoin NFT

NFT is the grand goal of our Wall-Ecoin project. It will allow users to create/auction/purchase NFT assets by themselves. In these transactions, relevant fees will be drawn for the protection of dogs.

02 MISSION

OPEN AND TRANSPARENT

Wall-Ecoin is a decentralized coin built on the community. It lays a solid foundation for the long-term development of Wall-Ecoin, through smart contracts and deflation mechanisms, as well as building community trust.

COMMUNITY

Community is everything, Wall-Ecoin strives to involve everyone from all over the world. Wall-Ecoin is one of the fastest-growing and most popular communities in the cryptocurrency field. We believe that only by the trust and unity of the community can we be strong.

TRUST

Trust is the most important, Trust is the cornerstone of cryptocurrency. The Wall-Ecoin smart contract has been audited by a third-party professional audit company, which means that the smart contract will strictly follow the defined deflation mechanism, burning and locking most of the tokens.

SUSTAINABLE DEVELOPMENT

Wall-Ecoin is a long-term project that pursues sustainable development. It will not lose the interests of community members for short-term gains. Through the deflation mechanism and the continuous development of the community, more decentralized applications will be launched.

03 BSC SMART CHAIN

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (DeFi). BSC uses a token protocol developed by the BinanceTeam called BEP-20.

Bep-20/BSC 5 seconds:

<https://trustwallet.com/blog/binance-smart-chain-in-numbers>

Advantages of the Binance smart chain are:

It's a proprietary blockchain, which will provide security and safety to all users and developers.

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

Wall-Ecoin is not responsible for the actions of the Binance smart chain network

04

Wall-Ecoin ECOSYSTEM

Autonomous Community

Wall-Ecoin is a completely decentralized and community-driven project, without owners, shareholders, promoters, marketers, managers, directors, or other persons or entities for any form of governance. Wall-Ecoin smart contract is open source, security audited, permanent, and cannot be modified in any way.

Instant Rewards

For every transaction in the Wall-Ecoin network, 4% fee will be allocated to existing holders. This means you can earn more by simply putting Wall-Ecoin in your wallet. Watch your puppy grow in every transaction!

Locked LP

Liquidity tokens are burned and locked. Additionally, 1% of all transaction fees are added to liquidity. Here you can view LP holders: <https://bscscan.com/token/0x19ec6a2a3bbdfa30eefbffa94239c29a27ed722f#balances>

05 CONTRACT AGREEMENT

Wall-Ecoin smart contract contains 3 simple functions:

Reflection+ Burn + LP acquisition

In each trade, the transaction is charged a 5% fee, which is split 2 ways.

For every transaction in the Wall-Ecoin network, a **4%** fee is distributed to existing holders. That means you earn more Wall-Ecoin just by holding it in your wallet.

40% of the total supply has been burned when Wall-Ecoin officially launched, That means out of the 4% of the redistribution 40% will be distributed to the dead wallet. Coins are burned with every transaction.

1% fee is split 50/50 half of which is sold by the contract into BNB, while the other half of the Wall-Ecoin tokens are paired automatically with the previously mentioned BNB and added as a liquidity pair on Pancake Swap.

06

ACHIEVEMENT

Wall-Ecoin First 30 Days

150k+ holders in a month | **25k+** telegram members | **25k+** twitter followers
15,000+ Instagram followers | Wall-Ecoin Swap | New Website Redesign
Audited by DESSERT FINANCE | Trends on CoinmarketCap and Dex Tools

***Some Influencers may have been compensated**

07 GROWTH MAP

Phase 1 - Birth

- Marketing push to spread awareness
- Website launch
- 5000 Telegram members
- Meme development
- Wall-Ecoin is Born!

Phase 2 - Crawl

- Influencer marketing push
- Listing on coin gecko
- Listing on coin market cap
- 25,000 telegram members
- 25,000 holders

Phase 3 - Walk

- 100,000 holders
- 100,000 Telegram members
- Airdrop #2
- Large influencer marketing push
- Listings on major CEX

Phase 4 - Run

- 150,000 holders
- increase marketing
- Wall-Ecoin Swap
- Add way more memes
- Website Redesign
- Wall-Ecoin Paw (Paw wallet growth tracker)

08 TOKENOMICS & STATS
